PROFESSIONAL SUMMARY

Computer Science & Engineering (AI & ML) graduate with specialized expertise in **image/video data auditing, visual defect reduction, and automated stream verification**. Demonstrated track record in high-attention video data analysis, frame-by-frame annotation quality control, and maintaining 99%+ data accuracy standards. Experienced in fast-paced operational workflows, continuous screen auditing, and dataset quality assurance. Applying for the **Associate, ML Data Operations (Job ID: 3134242)** position at Amazon GO-AI Operations.

CORE COMPETENCIES & AUDIT SKILLS

ML Data Auditing:	Image & Video Data Auditing, Bounding-Box Verification, Stow Quality Control, Visual Defect Reduction
Video Analysis Tools:	OpenCV Frame Ingestion, YOLOv8 Object Bounding, Tesseract OCR Text Parsing, Data Quality Logging
Operational Execution:	High Focus Screen Auditing (7 hrs/day), Productivity Targets, Rotational Shift Readiness, 24x7 Operations
Technical Foundation:	Python, Java, SQL, Spring Boot 2.7, MySQL, Git/GitHub, Dataset Formatting, Remote WFH Protocol

RELEVANT PROFESSIONAL EXPERIENCE

PARKNSECURE PRIVATE LIMITED <i>AI / ML Operations & Video Auditing Intern</i>	Bengaluru, India <i>May 2025 – June 2025</i>
- Performed precise video frame audits across hundreds of camera feeds per shift to verify vehicle localization and license plate bounding-box accuracy. - Audited 15–20 second video clips to identify stowing and parking activity locations, maintaining a 99%+ audit accuracy standard under strict quality benchmarks. - Utilized OpenCV image processing tools to inspect blurry and low-resolution video frames, ensuring reliable dataset verification before streaming into backend databases. - Maintained consistent operational speed and focus across 9-hour shifts, adhering to Amazon-standard quality and productivity guidelines.	

PROJECTS & DATA AUDITING EXPERIENCE

AI Malpractice & Video Auditing System <i>Technologies: Python, YOLOv8-Pose, OpenCV, Video Processing Tools</i>	GitHub Repo <i>2025</i>
- Reviewed and audited multi-camera video streams to track spatial-temporal anomalies, out-of-frame movements, and unauthorized actions with high precision. - Audited 17-point skeletal pose tracking data across extensive video segments to identify low-clarity posture changes under high attention to detail.	
Automatic Number Plate Recognition (ANPR) Data Pipeline <i>Technologies: OpenCV, Tesseract OCR, YOLOv8, Image Processing</i>	GitHub Repo <i>2025</i>
- Audited low-sharpness and low-light vehicle images to accurately mark license plate bounding boxes and text extractions. - Executed systematic data quality verification across image callsets to improve automated ML model training outputs.	

EDUCATION

GANDHI INSTITUTE OF TECHNOLOGY AND MANAGEMENT (GITAM)**Bengaluru, India***Bachelor of Technology (B.Tech) in Computer Science & Engineering (AI & ML)*

2022 – 2026 | CGPA: 7.91 / 10.0

CERTIFICATIONS & OPERATIONAL DETAILS

- **MongoDB Administration Certification (Infosys Springboard):** Certified in data schema design, indexing strategies, and dataset CRUD operations.
- **Smart India Hackathon (SIH):** Selected for university team 'HARBINGERS' for backend API contracts and structured data validation.
- **Shift & WFH Readiness:** Ready for 24x7 rotational shifts (including night shifts), 5-day working weeks, and dedicated WFH setup with laptop camera readiness.
- **Languages:** English (Professional), Kannada (Native), Telugu (Native), Hindi (Conversational).
